THE REPLY FILED 07 November 2005 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

1. ☒ The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:

- a) ☒ The period for reply expires 3 months from the mailing date of the final rejection.
b) ☐ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

AMENDMENTS

3. ☐ The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will not be entered because
(a) ☐ They raise new issues that would require further consideration and/or search (see NOTE below);
(b) ☐ They raise the issue of new matter (see NOTE below);
(c) ☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
(d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: _____. (See 37 CFR 1.116 and 41.33(a)).

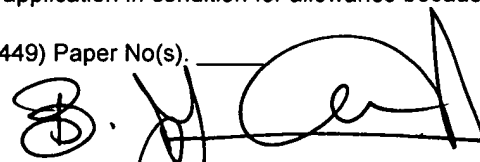

4. ☐ The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).
5. ☐ Applicant's reply has overcome the following rejection(s): _____.
6. ☐ Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
7. ☒ For purposes of appeal, the proposed amendment(s): a) ☐ will not be entered, or b) ☒ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.
The status of the claim(s) is (or will be) as follows:
Claim(s) allowed: none.
Claim(s) objected to: none.
Claim(s) rejected: 25-53.
Claim(s) withdrawn from consideration: none.

Continuation of 11:

Applicant's remarks filed 11/07/2005 have been considered but are found not persuasive.

In the remark, Applicant argued in substance that Linderman's provisional application 60-208045 (hereinafter '045) does not teach or suggest

- a) "automation equipment... configured to execute at least one automation program and at least one web service",
 - b) "a computer application configured to... provide a remote automation function... including at least one of monitoring, display, control, configuration, and programming of the automation function"
 - c) "any automation equipment that includes at least one of a programmable logic controller, a numeric controller, an instrumentation station, and a control station, as cited in Claims 45 and 52"
- and the provisional application points to generic discussion about a general product called "DaberNet".

In response to Applicant's arguments, '045' teaches the above limitations.

In response to (a), examine will interpret automation equipment as the server operation within DaberNet ('045, pg 003, 2nd paragraph), the server is to translate XML messages originated from Client side RPC call into the necessary commands to be executed behind the firewall, additionally, DaberNet will scale to include server configuration, and configuration of other network devices with specifications for network controllability. The web service would be translation and handling of RPC calls, and the automation program would be configuration of network devices.

In response to (b) computer application, i.e. DaberNet can provide at least programming of automation function as well as configuration and controlling of a remote network device as suggested in item (a) above.

In response to (c) automation equipment in DaberNet contains at least a control station and programmable logic controller residing on the server side. The server of DaberNet contains the controller to translate RPC commands and control devices behind firewall using necessary SNMP commands.

Thus, Applicant's arguments does not place the current Application in better condition for allowance, the rejection is maintained.
